Your retirement plan offers:	Why that's a good thing:
Tax-deferred savings	The contributions you make as well as any earnings made on the money in your retirement savings plan won't be taxed until you withdraw it.
Pre-tax contributions	The contributions you make to your plan are taken before taxes – that means less may come out of your paycheck than you might think.
A range of investment choices	Your retirement savings plan offers you a wide range of funds to invest in. So no matter what your risk tolerance, time horizon, or investing experience, there's a good chance you'll find investments to match your retirement savings strategy.

Investments are not guaranteed and are subject to investment risk including the possible loss of principal. The investment return and principal value of the security will fluctuate so that when redeemed, may be worth more or less than the original investment.
